Analysis Method

Overperforming large and small games added together and then any votes for the same doctrine in underperforming were subtracted off to give a net result which is used to rank doctrines from most powerful to least.

Summary

In PvP, Wehr - Panzerjager (Tank Hunter) was voted as the most overpowered doctrine. While the Soviet - Guards Rifle was voted the lowest performing doc.

Soviet OMSBON and British Combined Operations Command both had a similar number of votes for OP & UP. This leads us to think that there is further education to go into these non-conventional doctrines so players fully understand their strengths.

In PvE, the Soviet - Guards Armored doctrine ranked tops, while Luftwaffe ranked lowest.

PvE opinions place more docs in underpowered than overpowered. Also there are three distinct groups/bands for PvE.

Polarity of opinion is much greater in PvP than in PvE.
